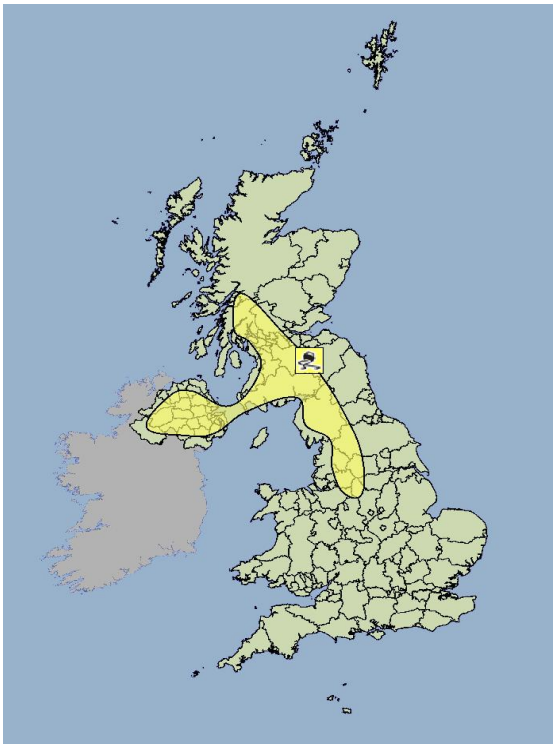
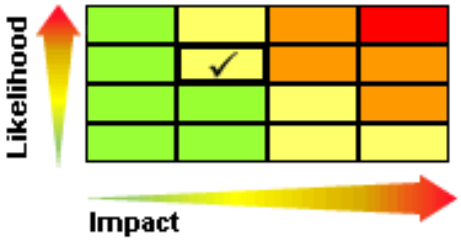
National Severe Weather Warning Service





Chief Forecasters Assessment
A cold northwesterly airstream will bring heavy showers or rain, sleet, snow and hail through this period. Clear spells in between will allow temperatures to fall close to or below freezing - hence the likelihood of some ice.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **18:00 on Thu, 17th Nov 2016** until **10:00 on Fri, 18th Nov 2016**

Wintry showers later on Thursday and overnight into Friday will lead to some ice, primarily on untreated surfaces but perhaps also where grit is washed off by frequent showers. Additionally, 1-3 cm of snow may accumulate on hills above around 100-200 m and more than 6 cm above 400 m. Some of the heaviest showers could produce slushy conditions even at low levels.

Please be aware of possible tricky travel conditions.
